Pronunciation

a [a] a in father*
 b [b] same as English
 č [tʃ] ch in chair (alt: ch)
 d [d] same as English
 ð [ð] th in this (alt: dh)
 e [e] e in bed
 f [f] same in English
 g [g] g in game
 h [h] same in English (never silent)
 i [i] i in pizza
 y [ɪ] i in him
 j [j] y in yes
 k [k] same in English
 l [l] same in English
 m [m] same in English
 o [o] o in cold
 p [p] same in English
 r [r] tap/trill r, no English equivalent
 s [s] same in English
 š [ʃ] sh in shoeshine (alt: sh)
 t [t] same in English
 þ [p] th in thing (alt: th)
 u [u] oo in boot
 v [v] same in English
 z [z] same in English
 ž [ʒ] si in vision (alt: zh)

DIPHTHONGS

ai [ai] i in fire
 au [au] ou in house
 ei [ei] a in late
 oi [oi] oy in boy
 ou [ou] o in home

p, b, t, d, k, g cannot end a syllable, if you are transliterating something into progāza with one of those letters at the end, add a vowel to the end. Emphasis is marked with a macron accent (ā)/(ǎ) and typically comes in the 1st or 2nd syllable of a word, depending on how long the word is.

*Approximate pronunciation. Please watch the video on sounds in Progāza to hear them.

Script

The script that Progāza uses is Kēša, an alpha-syllabary or impure abugida.

You might have seen it on some other pages of the book.

Warning – If you are viewing this digitally, and you have not downloaded the Yriga font, then the text will not show up correctly. Please, go to <https://tavyza.org/resources> and download the font.

Essential Sentence Structures

A is B	A B (ra)
A is not B	A B i ra
A and B	A za B za
A or B	A za B þu
A, but B	taš B, A
Not A, but B	taš B, A i ra
If A, (then) B	A-(y)kai B
If not A, (then) B	i B-(y)kai, A
Because A, B	A-(y)sol B
A of B	B-ju A
Although A, B	A-me B

Noun Cases

Progāza has 8 (?) noun cases. What does that mean?

Well, noun cases are modifiers for a noun. I am going to list all of the ones that are in progāza.

Plurality

no affix for 1 of something

add -(a)š -|ḡ|ḡ to the end of the word for a few of something

add -(e)n -|ḡ|ḡ to the end of the word for many of something

add -na -ḡ to the end of the word for all of something

Animacy-Based split ergativity

Wow, that's a lot of big words! This is a common trait of Ijeđa-based languages, along with the syntax.

I don't know how to explain it, i can only provide an example, so here.

“i am eating a rock” is “sa om tau” |ḡ ḡḡ ḡ

but “a rock is eating me” would be “ōmri saja tau” |ḡḡ ḡ ḡ

That's basically how it works. Inanimate nouns get a -ri -ḡ marker if it is the subject, and animate

nouns get a -ja -ḡ marker if it is the object.

oh, shit i gotta explain animacy now

Animacy

Progāza splits nouns into 2 classes, like Spanish, but instead of Masculine/Feminine, we have Animate/Inanimate. The definition for this in Progāza is quite loose, just “does it look alive?”, so it's very much up to you to decide if a new word is animate or not. These only influence ergativity (see the last section) and what definite article (or what flavor of “the” you use). (Va for inanimate, Ve for animate)

Dative

Have any of you learned German? cool

The dative case marks the indirect object of a verb.

Example: sa džākobiđo ēsun đūkazka ǎ́ ǎ́ǎ́ǎ́ǎ́ ǎ́ǎ́ǎ́ǎ́ǎ́

“sa” meaning “i” is the subject, džākobi is the indirect object (transliteration of “Jacob”), and ēsun is the object. the -đo suffix marks Jacob as the recipient of the thing being given in the verb, and the actual object here (water) would get marked with the nominative -ja suffix (if it was animate).

the sentence means “I gave Jacob water” (oh also -ka is another suffix I'll explain it in the verb conjugation section) is that all for dative? i think so.

Instrumental

i break the rock with an axe – sa nōkeǎ va om đumālne ǎ́ ǎ́ǎ́ǎ́ ǎ́ ǎ́ǎ́ǎ́ǎ́ǎ́ (i with axe the rock break).

the suffix -(u)ǎ -(ǎ)ǎ marks the tool that is being used for the action.

nōke is axe, if we add the suffix -(u)ǎ it means „with an axe“.

Locative

How the hell do you say you are at a place?

well, we have a suffix for that

sa reīkjavikaǎǎ ǎ́ ǎ́ǎ́ǎ́ǎ́ǎ́ (i am in/at/on Reykjavík)

simple enough

Allative

ok but how do you say you are going somewhere?

well, we have a suffix for that too!

sa Lōndončau čāze ǎ́ ǎ́ǎ́ǎ́ǎ́ǎ́ ǎ́ǎ́ǎ́ (i am going to London)

Ablative

ok but what if i'm leaving London (i don't want to be stabbed)

we also have a suffix for that! (this is getting a tad repetitive you get the idea)

sa Lōdonuki čāze ǎ́ ǎ́ǎ́ǎ́ǎ́ǎ́ ǎ́ǎ́ǎ́ (I am going from london/ I am leaving london)

for the last 2, if you didn't figure out what the suffix is, they are -čau and -(u)ki respectively.

Genitive (possession)

Wait, didn't we already do this?

yes we did the next section

wait that's all the suffixes

Verb Conjugation

how the fuck do i change verbs to fit my situation?

There are 4 verb tenses and imperfect imperfect verbs. This means that verbs can have eight different forms, and this applies to every verb.

no affix: tau (eating)

-ka suffix: taūka (was eating)

-žu suffix: taūžu (was eating a long time ago)

-šo suffix: taūšo (will be eating)

đ(u)- prefix: đūtau (eat)

đ(u)-#-ka affixes: đutaūka (ate)

đ(u)-#-žu affixes: đutaūžu (ate a long time ago)

đ(u)-#-šo affixes: đutaūšo (will eat)

To negate a verb, you use the “i” particle before the verb.

sa tau / ǎ́ ǎ́ – I'm eating

sa i tau / ǎ́ ǎ́ ǎ́ – I'm not eating

Conjunctions

Hi, so English has and, but, and if, right?
we have all of those.

and

A za, B za,

let me explain this.

A is sentence/thing 1, B is sentence/thing 2.

Well, why is “and” repeated twice?

That's right, “and” is repeated twice for a reason that i do not know. All i know is we also have something else that i will explain in the next section. Just remember, “za” goes before *and* after the thing/sentence you are using it for.

or

A za B þu

Yes, instead of “za” after, there’s “þu”. Other than that, it works the same as “And”

but

A, taš B

pretty simple, it just works how it would in English.

Sa om ānoð, **taš** seð grātaž: Ḷ ḶḶ ḶḶḶ: ṽṽ ṽṽ ṽṽṽ (i have a rock, **but** it’s gone.)

Converbs

Progāza has 9 converbs.

Here’s a list of them and how to use them:

suffix | example word | meaning | example sentence | sentence in English

-(y)þi | taūþi | while/when | sa taūþi āvi | i am walking while eating

-(y)sir | taūsir | after/having done | sa taūsir āvi | i am walking after eating

-(y)sol | taūsol | because | sa taūsol āvi | i am walking because i am eating

-(y)šav | taūšav | before | sa taūšav āvi | i am walking before eating

-(y)mir | taūmir | after | sa taūmir avi | i am walking immediately after eating

-(a)žo | taūžo | again | sa taūžo | i am eating again

-(e)kai | āvikai | if/then | sa āvikai sa nīsun i ra | if i walk, i won’t be here

-(e)me | īrame | despite | saja īrame sa saraī | despite me sleeping, i am tired

-(y)šai | āvišai | in order to | sa āvišai ðutaū | in order to walk, i eat

Auxiliary Verbs

Auxiliary verbs are somewhat simple. You put them before the main verb in a sentence, or treat them as a main verb. Auxiliary verbs are words like “want”, “need”, and “can”. Let's use an example sentence:

Romānkeša | 𑀓𑀲𑀭𑀸 | English

Sa ja pūšy dūham | 𑀱𑀺𑀧𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸 | I need to help you

sa – I

ja – you

pūšy – need (aux verb)

ham – help

ḍ(u)- - perfect verb prefix

If you look on the spreadsheet for the language, or the dictionary a few pages further (or a separate dictionary book), all auxiliary verbs will be marked with “AUX”, so you don't need to figure out whether or not it's an auxiliary verb.

according to Google, an auxiliary verb is:

"a verb used in forming the tenses, moods, and voices of other verbs."

a tense (in grammar) is a set of forms taken by a verb to indicate the time and sometimes completeness of a verb

and mood is a category or form which indicates whether a verb expresses fact, command, question, wish, or conditionality.

oh wait i gotta explain some of that too

Commands

You can tell people to do stuff with the -vo suffix

example romānkeša | 𑀓𑀲𑀭𑀸 | English

ni om ḍutaūvo | 𑀲𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸 | eat this rock

Questions

You can ask people to do stuff with the -ža suffix

example romānkeša | 𑀓𑀲𑀭𑀸 | English

ni om ḍutaūkaža; | 𑀲𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸 | do you want to eat this rock?

Adjectives

What is an adjective?

An adjective is a part of speech that is used to describe a noun. In progāza, they can be used as a standalone adjective, or as a nounal adjective (note: noun-like adjective)

Nounal adjective

a nounal adjective is an adjective that works like a noun. Example:

va om sēro (ra): | 𑀲𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸𑀓𑀲𑀭𑀸 | the rock is blue.

the rock blue (is)

How adjectives work in progāza

as just "adjectives":

va sēro om: | 𑀧 𑀮𑀺 𑀲𑀸 | the blue rock

as nounal adjectives

va om sēro (ra): | 𑀧 𑀲𑀸 𑀮𑀺 𑀲𑀸 | the rock is blue

if you want to say something like "I want to eat the bread that's on the table." it would translate something like "sa ve jēnaḍi mikēra šai ḍūtau:" "𑀰 𑀶 𑀧𑀺𑀲𑀸 𑀮𑀺𑀲𑀸 𑀲𑀸 𑀲𑀸𑀲𑀸"

Here is the sentence broken down:

Sa – I (the Subject)

Ve jēnaḍi mikēra - The bread that is on the table. Ve is a definite particle, like the word “the” in English. Mikēra is the word for bread. Jēnaḍi is from the word “jēna,” which means “table/desk”, and the locative suffix “-ḍi”, meaning “at/on/in”. When this is placed in front of the noun Mikēra, it behaves like an adjective, meaning “(that is) on the table”.

Most, more, less, least

In Progāza, these are handled with prefixes.

prefix | English equivalent | example sentence | 𑀮𑀺 | example sentence in English

čep- | most | sa čēpsana | 𑀧 𑀲𑀸𑀲𑀸 | i am the best

pap- | more | sa pāpsana | 𑀧 𑀲𑀸𑀲𑀸 | i am better

jaḅ- | less | sa jāpsana | 𑀧 𑀲𑀸𑀲𑀸 | i am worse (i am less good)

ič- | least | sa ičsana | 𑀧 𑀲𑀸𑀲𑀸 | I am the worst (I am the least good)

Other affixes and grammatical particles

affix/particle | example sentence | kēša | example translation

čēpi | sa čēpi saraī | 𑀧 𑀲𑀸𑀲𑀸 𑀲𑀸 | i am very tired || note: "very"

yḅ- | yḅkoīḍo sa om kaz | 𑀲𑀸𑀲𑀸 𑀧 𑀲𑀸 𑀲𑀸 | i am giving a rock to a lot of people || note: a lot of

to- | tokoīḍo sa om kaz | 𑀲𑀸𑀲𑀸 𑀧 𑀲𑀸 𑀲𑀸 | i am giving a rock to each person || note: each

sup- | supkoīḍo sa om kaz | 𑀲𑀸𑀲𑀸 𑀧 𑀲𑀸 𑀲𑀸 | i am giving a rock to any person || note: any

če- | čekoīḍo sa om kaz | 𑀲𑀸𑀲𑀸 𑀧 𑀲𑀸 𑀲𑀸 | i am giving a rock to some people || note: some

Affix page stuff

These are all affixes from the Progāza spreadsheet.

PROGĀZA	ᠮᠣᠩᠭᠠᠵᠠ	EXPLANATION
ry-	ᠷᠢ-	-er suffix in english, as in "baker"
by-	ᠪᠢ-	-ed suffix in english, as in "baked"
ky-	ᠬᠢ-	noun to adjective, "that is ___"
